2. Attend your appointment

Present your health insurance card (or Certificate of Eligibility), get screened and pay your copayment.

If you received a free coupon voucher...
>>Present the voucher at your appointment.

⇒

3. Get result

Gastric/lung/colorectal/breast cancer

Reviewed by a doctor.

Cervical Cancer

The result is typically sent by postal mail but it may be reviewed by a doctor in some cases.

One in two people develop cancer in their lifetime.
One in three deaths are caused by cancer.

Hachioji city's cancer screenings are available for applicable registered residents who have not got screened at their own or spousal workplace, at school or with any other opportunities including comprehensive physical examinations (ningen-dokku).

Take charge and get screened for yourself and for the ones you love.

Physical Exam Voucher

Especially for those who are enrolled with the national health insurance, the medical care system for seniors aged 75 and over as well as public assistance recipients, a physical exam voucher are mailed out in **late May**.

⇒

Result

Reviewed by a doctor.

(*)Application is required for Hepatitis Screening and the Physical Exam for 18 - 39 Year Olds.

(*)For Dental and Periodontal Screening and Dental Checkup for Seniors, a coupon will be mailed to all eligible residents: no application is needed.

FY 2025

Hachioji City Gastric Cancer Endoscopic Screening

Eligible
persons

Residents aged 50 years and older (born on or before March 31, 1976)
(Every 2 years)

Please read the following thoroughly before your appointment.

◆ Anyone with following conditions should not receive the screening.

- ◆ Persons who have undergone a total gastrectomy
- ◆ Persons who are currently being treated or under follow-up care for gastric diseases
- ◆ Persons who are or might be pregnant
- ◆ Persons who are unable to tolerate the endoscopic procedures
- ◆ Persons who are suffering from respiratory failure, heart disease and high blood pressure
- ◆ Persons who are judged to be unable to tolerate the testing (The physician may decline the testing due to the physical and mental conditions of the patient.)
- ◆ Persons with obvious or suspected bleeding tendency (those taking antithrombotic drugs)
*For safety reasons, the above persons should not receive the screening; however, there may be some exceptional cases depending on the drug they are taking and facility's equipment. Please contact the facility which you wish to make your appointment with for detail.

◆ Sedation will not be given for safety reasons.

◆ All patients are asked to sign the consent form.

- ◆ Please receive the screening after being fully informed about the procedure.

◆ A biopsy may be ordered

- ◆ A biopsy may be performed on a suspected tumor by collecting its cells to check for cancer.
- ◆ The biopsy fee will be charged separately using your health insurance. (The consultation fee will apply to the following visit for the result reviewing.) Please have your health insurance card (or Certificate of Eligibility) when going to your appointment. (If you are a public assistance recipient, inform the medical facility when making an appointment. Please be aware that available facilities are limited.)

All precautions relating to the testing should be discussed at the time of appointment booking.

Testing may be declined

Endoscopy involves passing an endoscope through the throat or nostril, which places a certain burden on the body.

Please note that the doctor may, at his/her own discretion, decline the testing due to the physical conditions of the patient.

The City's Cancer Screening Program

Pros and Cons

The five government-recommended cancer screenings have the following **advantages** and **disadvantages**. The benefits of preventing cancer deaths have been proven to outweigh these low-probability disadvantages.

Pros

- ◆ Reduced mortality rate by early detection and early treatment of cancer
- ◆ Treatment with minimal physical stress is more likely to be achieved with early detection.

Cons

- ◆ A latent cancer may remain undetected.
- ◆ False-positive results can lead to unnecessary testing and treatment.
- ◆ Accidents associated with testing
- ◆ Anxiety before finding out the results

Data

Your screening history and results will be recorded and analyzed for the improvement of the program. Results of your further testing will be shared with the city.

Result

Be sure to undergo further testing when your result shows they are required. Even when your result says no further testing necessary, do consult with a physician if you have symptoms or concerns.

Get screened regularly

Everyone should undergo screenings **on a regular basis**.

Persons with symptoms

This program is meant for persons without ongoing symptoms.

If you are experiencing symptoms, have some concerns or are undergoing treatments or follow-up cares for an applicable cancer, please **seek treatment with using your health insurance**.

The screenings are recommended for...

The national government recommends cancer screenings for everyone who is **69 years old or younger**. The city has developed the second phase of the Cancer Control Promotion Plan (FY2024-2029) with the basic principle of "preventing premature deaths from cancer".

Details ▶

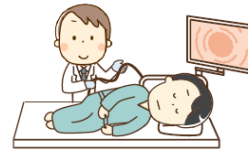

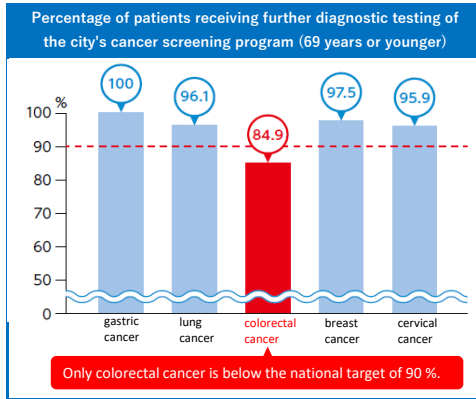

Be sure to undergo further testing if the screening result indicates the need.

If your cancer screening result indicates the need for further testing, it means that **the likelihood of cancer cannot be ruled out**. Further evaluation is required to determine the presence or absence of disease.

Further diagnostic testing for colorectal cancer is done with **colonoscopy**.

The fecal occult blood test should not serve as a diagnostic examination

- ✓ Because lesions do not always bleed, fecal occult blood tests can lead to the oversight of cancer.
- Do not assume bleeding to be non-emergent, such as hemorrhoids or menstruation**
- ✓ Early stage colorectal cancer may not cause any subjective symptoms.
- ✓ Source of bleeding may not be one and mixed with bleeding from the lesion.

Be sure to get further testing to best ensure your health.

The following persons are eligible for a free screening voucher

1. Public assistance recipients >> No application necessary (Please contact the city before making an appointment if you are new)

2. Persons exempt from FY2024 resident tax.

>>An application must be filed before getting screened. (Please note that paid fees are not refundable.)

(A free screening voucher that can be used for all eligible screenings will be mailed to you upon request.)

Please confirm the following before filling an application for the voucher.

◆Are all members of your household officially registered in Hachioji city as of January 1, 2024?

>>If you moved to Hachioji from another city after January 1, 2024, Tax Exemption Certificates for FY2024 of all 18+ year old household members issued by the previous municipality should be attached to your application.

◆Are all members of your household exempt from residence tax?

>>Please be aware that if any of your household member is not exempt or hasn't filed income, the whole members will not be eligible for the voucher.

Three Application Methods

1. Postal mail

- ◆Complete the below application form and glue it to a postcard or place it in an envelope and mail it to the city office.
- ◆An application is required for each eligible person.

2. Visit the City Office

- ◆Visit the Adult Health Section (1F, counter 14) of the city office.
- ◆Please present your legal ID (health insurance card (or Certificate of Eligibility) driver's license, etc.) at the counter.

3. Online

- ◆Hachioji city's website.
<https://www.city.hachioji.tokyo.jp/>
- You can apply online from the Electronic Application Service page linked below the Online Services box on the home page.
- Category search: "保健衛生・医療"
- Keyword search: "がん"

As of March 1, 2025

Please Note the following.
Gastric Cancer Endoscopic Screening: Public assistance recipients must make an appointment with designated medical facilities. Please note that the Hachioji Clinic Shincho, Hachioji Kenko Kanri Center, Onaka Clinic, Shiratori Naika are not a designated facility under the public assistance program.
Lung Cancer Screening: Those who have already received a chest x-ray under another program and those who are or might be pregnant should not receive this screening.
Breast Cancer Screening: Premenopausal women may benefit by undergoing screening 7-10 days after period. Mammogram is a dedicated radiographic technique for imaging the breast. Those who are or might be pregnant, are breastfeeding or have breast implants should not receive this screening. If you have an implanted device such as pacemaker, VP shunt or venous access port, please consult with the medical facility first.
Cervical Cancer Screening: Avoid washing or douching the inner parts of the vulva the day before the test. Sexual intercourse should also be avoided for 24 hours before the test. If you are having your period on the day of the test, please call to reschedule. Women who have had a total hysterectomy (removal of the uterus) are not eligible for this screening.

*Your appointment may be declined at the discretion of the doctor.
