1. Schedule your appointment	2. Attend your appointment	3. Get result
<p>Contact one of the facilities (listed on the back page) to schedule your appointment.</p> <p>If you were exempt from FY2023 resident tax... >>Apply to the city before booking an appointment. A coupon voucher will be mailed if you are eligible.</p>	<p>Present your health insurance card, get screened and pay your copayment.</p> <p>If you received a free coupon voucher... >>Present the voucher at your appointment.</p>	<p>Gastric/lung/colorectal/breast cancer Reviewed by a doctor</p> <p>Cervical Cancer The result is typically sent by postal mail but it may be reviewed by a doctor in some cases.</p>

Inquiries: 3-24-1 Motohongo-cho, Hachioji-shi, Tokyo 192-8501 Health and Medical Division, Adult Checkup Section Phone 042-620-7428

One in two people develop cancer in their lifetime.

One in three deaths are caused by cancer.

Hachioji city's cancer screenings are available for applicable registered residents who have not got screened at their own or spousal workplace, at school or with any other opportunities including comprehensive physical examinations (ningen-dokku).

Take charge and get screened for yourself and for the ones you love.

Physical Exam Voucher

Especially for those who are enrolled with the national health insurance, the medical care system for seniors aged 75 and over as well as public assistance recipients, a physical exam voucher are mailed out in **late May**.

Screening period

Saturday, June 1, 2024 - Friday, January 31, 2025

How to get screened

*Application is required for hepatitis screening and the physical exam for 18 - 39 year olds.

About the City's Screening Program

●The screenings are recommended for...

The national government recommends cancer screenings for everyone who is 69 years old or younger.

●Pros and Cons

Cancer screening can help detect cancers in the early stage when the cancer is more likely to be curable and reduce cancer mortality. Despite those possible benefits (pros), cancer screening also has drawbacks (cons). Drawbacks of screenings are screening results leading to unnecessary worry and further testing as well as accidents associated with testing. A latent cancer may also remain undetected due to a false test result.

●Data

Your screening history and results will be recorded and analyzed for the improvement of the program. Results of your further testing will be shared with the city.

●Result

Be sure to undergo further testing when your result shows they are required. Even when your result says no further testing necessary, do consult with a physician if you have symptoms or concerns.

●Get screened regularly

Everyone should undergo screenings on a regular basis.

●Persons with symptoms

This program is meant for persons without ongoing symptoms. If you are experiencing symptoms, have some concerns or are undergoing treatments or follow-up cares for an applicable cancer, please seek treatment with using your health insurance.

FY 2024

Gastric Cancer Endoscopic Screening

Eligible persons

Residents aged 50 years and older (born on or before March 31, 1975)
(Every 2 years)

Please read the following thoroughly before your appointment.

● Anyone with following conditions should not receive the screening.

- Persons who have undergone a total gastrectomy
- Persons who are currently being treated or under follow-up care for gastric diseases
- Persons who are or might be pregnant
- Persons who are unable to tolerate the endoscopic procedures
- Persons who are suffering from respiratory failure, heart disease and high blood pressure
- Persons who are judged to be unable to tolerate the testing (the physician may decline the testing due to the physical and mental conditions of the patient).
- Persons with obvious or suspected bleeding tendency (those taking antithrombotic drugs)

*For safety reasons, the above persons should not receive the screening; however, there may be some exceptional cases depending on the drug they are taking and facility's equipment. Please contact the facility which you wish to make your appointment with for detail.

● Sedation will not be given for safety reasons.

● All patients are asked to sign the consent form.

-Please receive the screening after being fully informed about the procedure.

● A biopsy may be ordered

-A biopsy may be performed on a suspected tumor by collecting its cells to check for cancer.

-The biopsy fee will be charged separately using your health insurance. (The consultation fee will apply to the following visit for the result reviewing.) Please have your health insurance card when going to your appointment.

(If you are a public assistance recipient, inform the medical facility when making an appointment. Please be aware that available facilities are limited.)

All precautions relating to the testing should be discussed at the time of appointment booking.

Testing may be declined

Endoscopy involves passing an endoscope through the throat or nostril, which places a certain burden on the body.

Please note that the doctor may, at his/her own discretion, decline the testing due to the physical conditions of the patient.

Mammography-Only Breast Cancer Screening Program Without Visual Palpation Begins

● In February 2016, the national government revised its guideline to advise screening operators to exclude visual palpation and to only perform mammogram in stead of performing both.

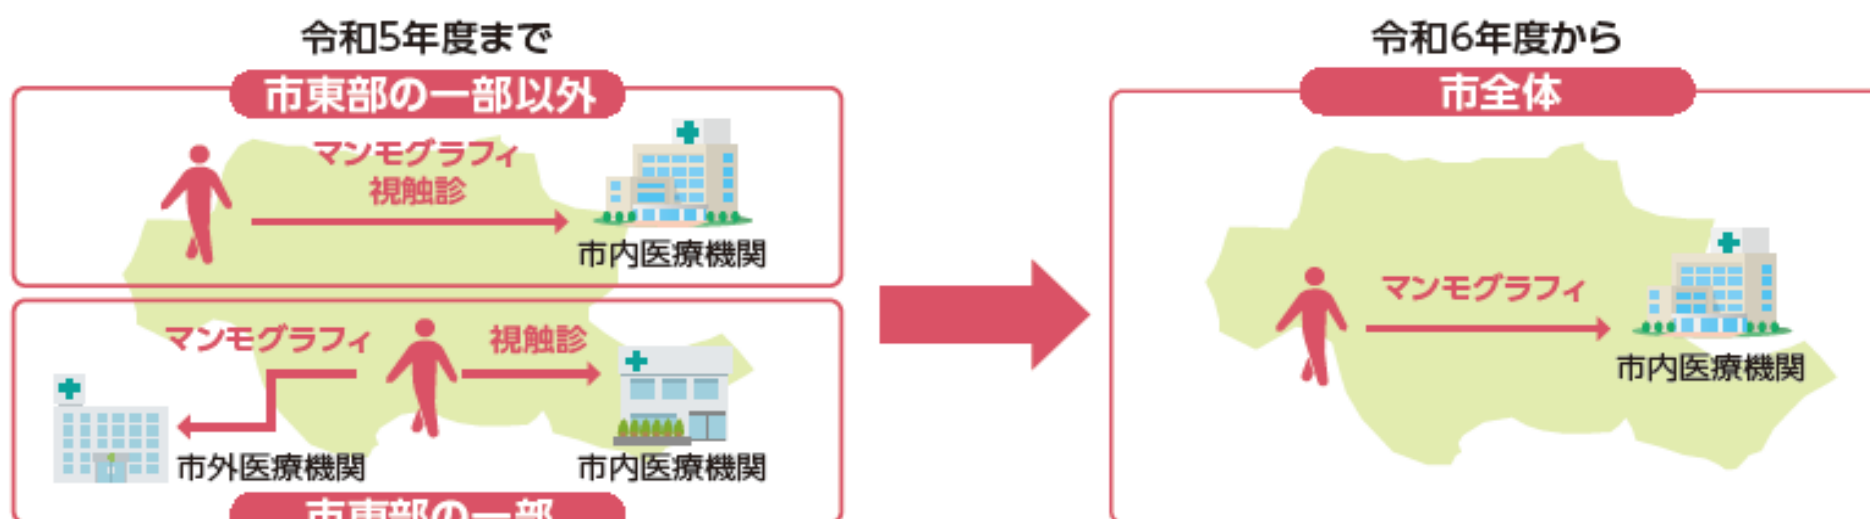

The guideline states that visual palpation should only be done as an adjunct to mammography.

● Even when visual palpation was performed in previous years, the result of breast cancer screening was determined based upon the mammography examination.

● In order to secure the number of residents being screened with very limited number of local medical institutions that were equipped to provide mammography in some areas of the eastern part of the city, mammography was outsourced to out-of-city institutions and the palpation and explanation of the results were given at a medical institution in the city. (Since 2013 until

● However, in recent years, the number of mammography facilities has increased, and there is no longer a need for visual palpation to ensure screening slots with local medical institutions that don't offer mammography. Therefore, from FY2024 onward, the city's breast cancer screening is solely performed with mammography without palpation. Your understanding is highly appreciated.

This modification is described in detail in the "2nd Hachioji City Cancer Control Management Plan (FY2024-FY2029)".

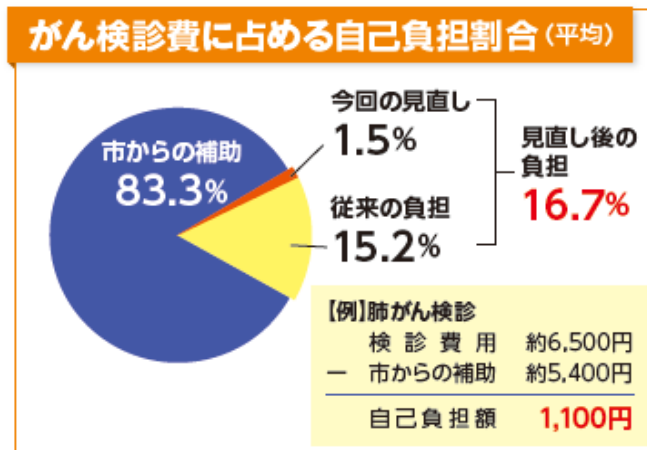

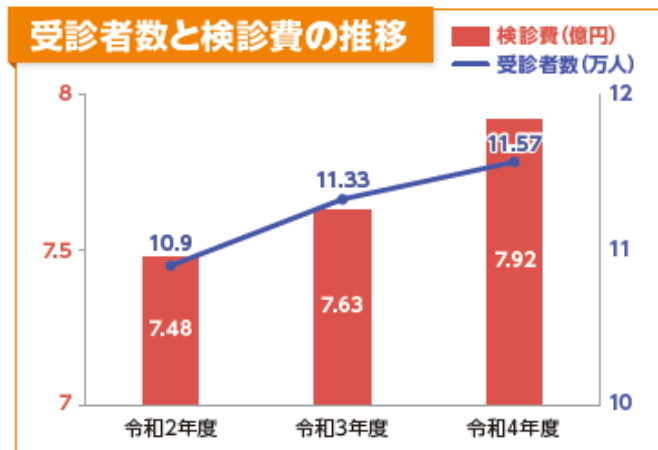

Changes in Copayments for

Cancer Screenings and Physical Examination for 18-39 Year Olds

The number of screening recipients has been increasing since the copayment amount was raised in FY2020 and the municipal share of the cost reached 790 million yen in FY2022. (Compared to FY 2020, the number of recipients increased by approximately 6,700 and the cost increased by approximately 45 million yen.) In order to continue to maintain and improve the quality of the screening and physical exams, and increase accessibility of the whole program, securing the budget by raising the copayment amounts is inevitable.

We sincerely ask your understanding regarding the changes in copayment amounts for cancer screening and the physical examination for 18-39 year olds in FY2024.

*Please refer to the front page of this guide for eligibility, copayment price and other detail.

The following persons are eligible for a **free screening voucher!**

1. Public assistance recipients >> No application necessary (please contact the city if you are new to the program.)
2. Persons exempt from FY2023 resident tax.

An application must be filed before getting screened. (Please note that paid fees are not refundable.)

A free screening voucher that can be used for all eligible screenings will be mailed to you.

Please confirm the following before filling an application for the voucher.

- Are all members of your household officially registered in Hachioji city as of January 1, 2023?

>>If you moved to Hachioji from another city after January 1, 2023, Tax Exemption Certificates of all 18+ year old household members issued by the previous municipality should be attached to your application.

- Are all members of your household exempt from residence tax?

>>Please be aware that if any of your household member is not exempt or hasn't filed income, the whole members will not be eligible for the voucher.

■ Application Methods (Three methods available)

1. Postal mail

- Glue the below application form to a postcard or place it in an envelope and mail it to the city office.
- A separate application form is required for each applicant.

2. Visit the City Office

- Visit the Adult Checkup Section (1F, counter 14) of the city office and apply in-person.
- Please present your legal ID (driver's license, health insurance card, etc.) at the counter.

3. Online

<PC>

- Via Hachioji city's website.

<https://www.city.hachioji.tokyo.jp/>

Apply with using the electronic application service within the online service box of the top page.

<Mobile phone/smart phone>

- Via Tokyo Municipalities Joint Electronic Application Service

<https://www.shinsei.elg-front.jp/tokyo2/>

You can visit the website by scanning the matrix barcode below.

As of March 1, 2024

Please Note the following.

Gastric Cancer Endoscopic Screening: The following medical facilities are not available for those on public assistance: Hachioji Clinic Shincho, Hachioji Kenko Kanri Center, Onaka Clinic, Shiratori Naika lin and Minamino City Clinic.

Lung Cancer Screening: Those who have already received a chest x-ray under another program and those who are or might be pregnant should not receive this screening.

Breast Cancer Screening: Premenopausal women may benefit by undergoing screening 7-10 days after period. Mammogram is a dedicated radiographic technique for imaging the breast. Those who are or might be pregnant, are breastfeeding or have breast implants should not receive this screening. If you have an implanted device such as pacemaker, VP shunt or venous access port, please consult with the medical facility first.

Cervical Cancer Screening: You may take a bath the day before the test but avoid washing the inner parts of the vulva or douching. Sexual intercourse should be also avoided for 24 hours before the test. If you are on your period when you're due to go for your appointment, please call and reschedule. Those women who have undergone a total hysterectomy (the removal of the uterus) are not eligible for this screening.

*Your appointment may be declined at the discretion of the doctor.
